Bible Study Method

The SOAP Bible Study method is a great way to really focus in on one scripture and pray and listen to what God is speaking to you about this scripture. And then apply it to your life!

Step by Step Guide

Start by picking out a chapter in the Bible to read.
That's it. *Just one chapter.*

Before you begin reading, pray and ask the Holy Spirit to reveal one verse to you that he wants you to meditate on.

As you read the chapter, pay attention to which verse "jumps out at you".

Scripture

Write out the scripture that stuck out to you.

Observe

Observe the verse. Really study it. I like to use bullet points in this section. Take apart the verse and write what you're seeing in it. What stands out to you in this verse.

Apply

How can you apply what God showed you in the "Observe" step to your life? Write down some actionable steps you can take to apply the truths of the Word in your everyday life.

Prayer

Write down a specific prayer around the truths that have been revealed to you during your time with Jesus.

Scripture

Observe

Apply

Prayer
